Response to “Dramatic Decreases in BMI Percentiles, but Valid Conclusions Can Only Come From Valid Analyses”

We thank you for the opportunity to respond to Dr Lucan¹ with respect to the letter about our article, “A Multi-component, School-Based Intervention, the *Shaping Healthy Choices Program*, Improves Nutrition-Related Outcomes.”² We acknowledge the points raised in this letter. Based on the comments, additional analyses were conducted on the full data set. These results, along with some amended statements, can be found in a corrigendum published in this issue.
