Corrigendum

The September-October 2010 issue of the *Journal of Nutrition Education and Behavior* carried a Great Educational Materials (GEMs) article titled “A “Healthy Pizza Kitchen” Nutrition Education Program at a Children’s

Health Museum” (J Nutr Educ Behav. 2010;42(5):353-354; <https://doi.org/10.1016/j.jneb.2010.01.012>). A second author was inadvertently omitted and the author byline should have read “Marjorie R. Freedman, PhD;

Diane Vecchi, MS”; both authors had the same affiliation: “Nutrition, Food Science, and Packaging Department, San José State University, San Jose, CA.” The authors regret this error.

Corrigendum

The April 2019 issue of the *Journal of Nutrition Education and Behavior* carried a Research Article titled “*Make It Fresh, for Less!* A Supermarket Meal Bundling and Electronic Reminder Intervention to Promote Healthy Purchases Among Families With Children” (J Nutr Educ Behav. 2019;51(4):400-408; <https://doi.org/10.1016/j.jneb.2019.01.012>). Due to

a systematic error in the research team’s sales database, the reported sales from quantity and price for some items were miscalculated. These errors do not affect the interpretation of results or conclusions, but change all of the values reported in Tables 2 and 3, Figure 2, and [Supplemental Table 4](#), and some of the values in [Supplemental Table 1](#). Please see the

following for [Revised Tables 2 and 3](#) and the [Revised Figure 2](#).
The authors regret this error.

SUPPLEMENTARY DATA

Supplementary data related to this article can be found at <https://doi.org/10.1016/j.jneb.2020.06.001>.

Revised Figure 2. Weekly spending per transaction on bundled items in intervention and comparison stores.

Revised Table 2. Mean Monthly Spending (US Dollars) on Bundled Foods, by Treatment Arm Among 299 Parents and Caregivers Enrolled in *Make It Fresh, for Less!*

Assigned Treatment Arm	As Randomized (n = 299)				Shopped During Intervention (n = 238)			
	Baseline Mean (SE)	Intervention, Randomized Mean (SE)	Difference Mean (95% CI)	P	Baseline Mean (SE)	Intervention, Received Mean (SE)	Difference Mean (95% CI)	P
Intervention	0.97 (0.08)	1.13 (0.09)	0.16 (0.01 to 0.31)	.04	1.18 (0.10)	1.36 (0.12)	0.18 (−0.01 to 0.36)	.07
Control	0.86 (0.08)	0.98 (0.09)	0.13 (−0.03 to 0.28)	.11	1.02 (0.09)	1.16 (0.11)	0.14 (−0.03 to 0.32)	.11
Difference	0.11 (0.11)	0.15 (0.13)	0.03 (−0.18 to 0.25)	.77	0.16 (0.13)	0.19 (0.16)	0.03 (−0.23 to 0.29)	.81

CI indicates confidence interval.
Note: Results are from regressions controlling for monthly food spending and including random intercepts to account for repeated observations. *t* statistics were used to test the null hypothesis that the change from baseline to intervention in the intervention arm was equal to control.
